

Accredited Veterinarians:

The USDA APHIS Veterinary Services, Los Angeles Port Office (222 Kansas St, El Segundo, CA 90245) will be implementing an appointment system for the endorsement of international health certificates for pets **starting Monday, February 5, 2018.**

This is a significant change from our previous walk-in only service of the past. The goal of the change is to eliminate long waiting times and provide last minute travelers with the security of having a set time to get their certificates processed.

To assist us with this goal, we ask that when discussing international travel with clients and issuing international health certificates for pets, please inform your clients they have options.

1. They may send their certificates to a Veterinary Services Endorsement Office anywhere in the U.S. (**For California** - addresses below) through regular mail, or via a pre-paid overnight express mail service, with tracking, and receive their processed certificate within 48-72 hours

OR

2. For last minute travelers, they may make an appointment at the Los Angeles Port Office.

Thank you very much for your assistance and please contact us at VSPSLAX@aphis.usda.gov with any questions.
